MERIDIAN

Background

Motusbank is a digital bank geared towards Millennials and Gen Z and is a subsidiary of Meridian Credit Union.

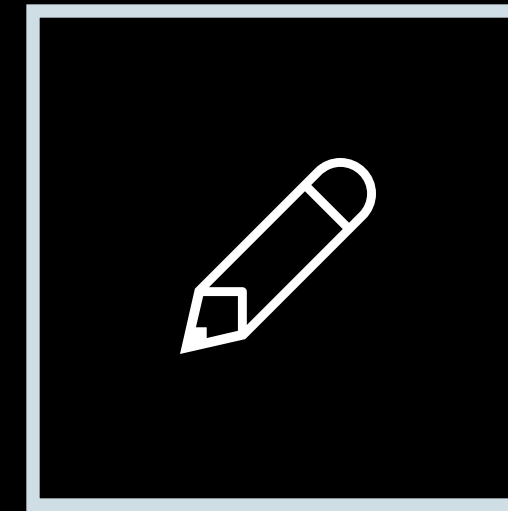

TEAM

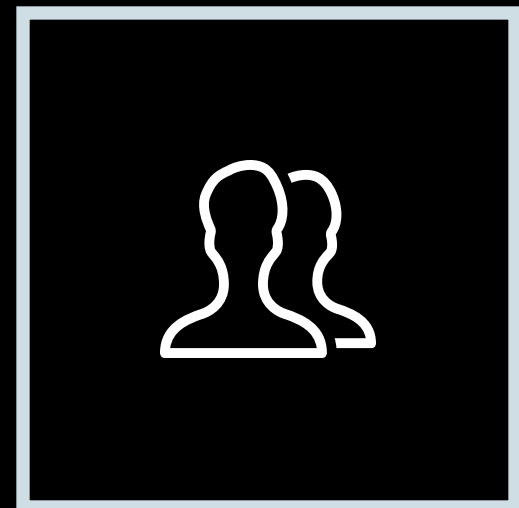

Area VP

Provided guidance on roadmap.
Communicated progress to executives.
Provide resources and removed roadblocks.

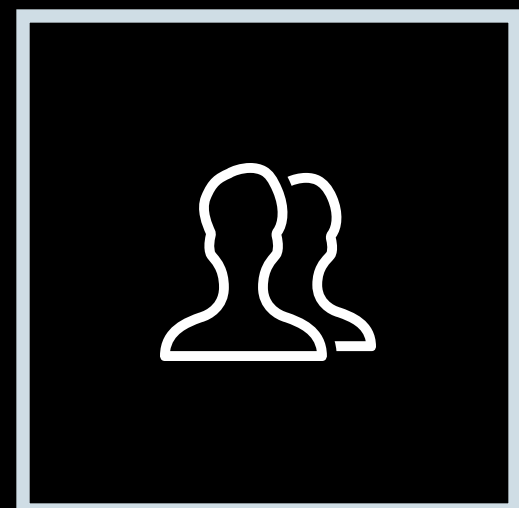

Product Designer

- Collected data from data team and ran surveys
 - Assisted in shaping the design and product strategy
 - Ran internal workshops
 - Helped create user stories
-
- Created wireframes and information architecture
 - Designed UI
 - Held and facilitated reviews
-
- Built prototypes
 - Conducted user testing
-
- Worked closely with developers during handoff

Senior Product Manager Product Manager

5 Developers

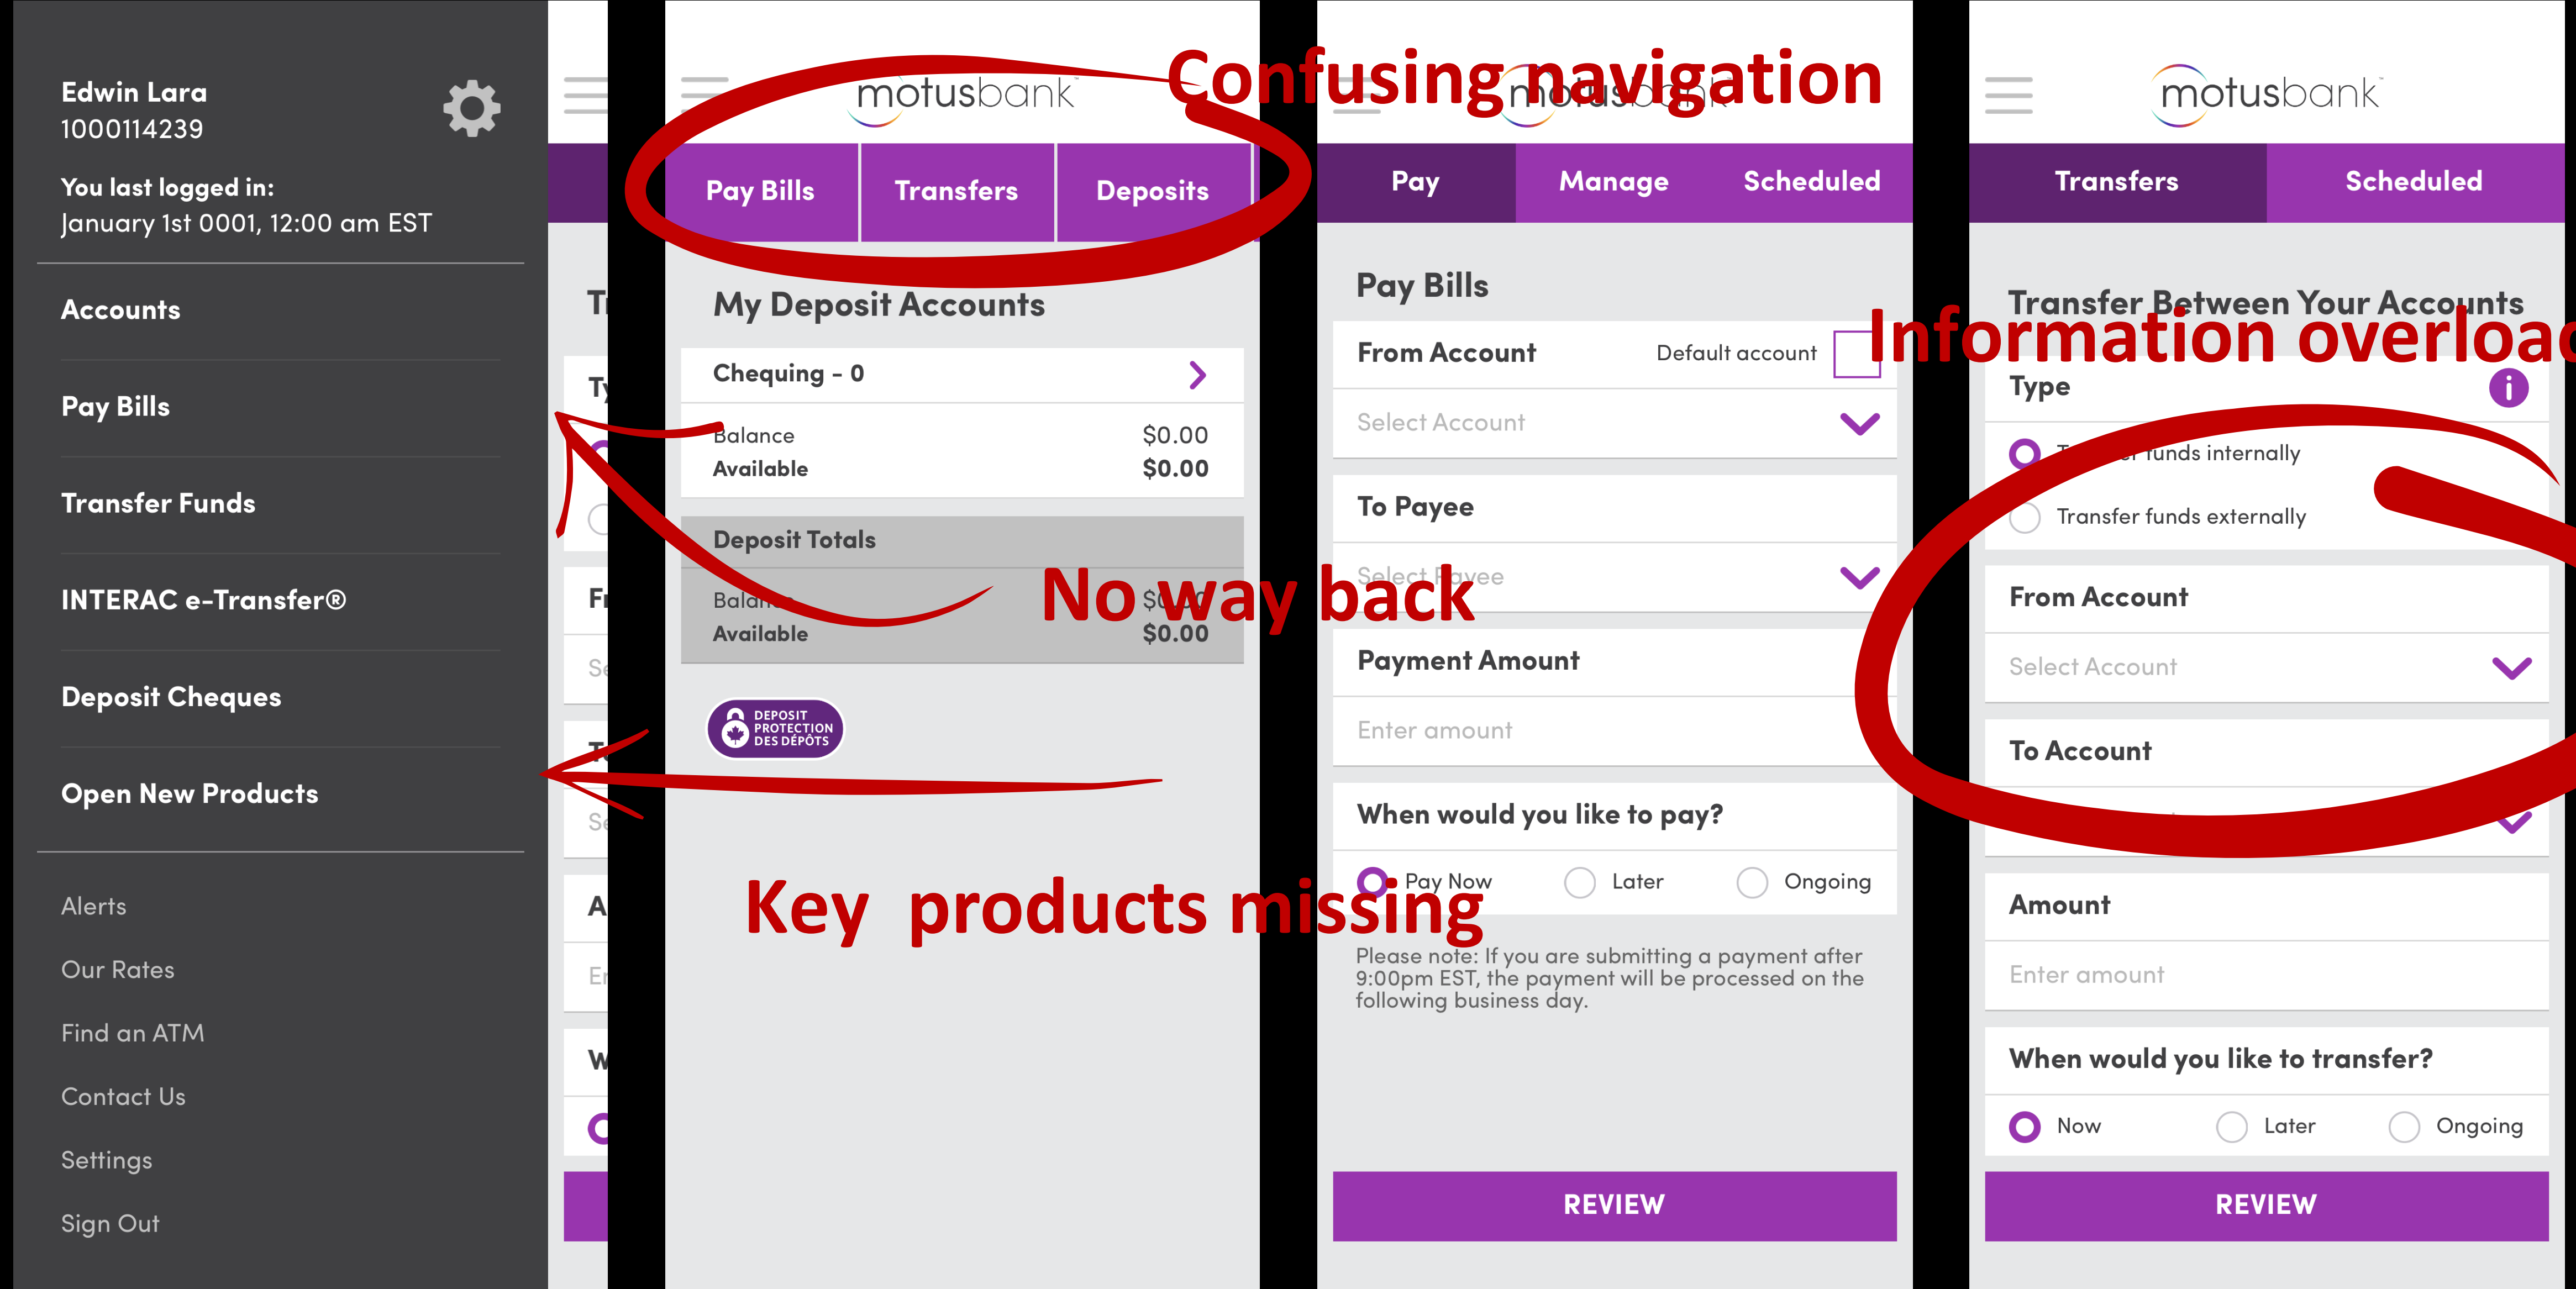

OLD DESIGN

Insights from tellers and previous surveys

- In-app navigation was confusing and broken
- Primary flows were confusing
- Overall UI was visually unappealing to the target demographic
- Missing key features that millennials look for in banking app, such as investing and borrowing/credit cards
- Lacked the option to login via Face ID

Poor wayfinding throughout app

poor hierarchies and lacking structure

Confusing verbiage

APP STORE REVIEWS

App is fine, the look is not

App is okay but desperately needs a revamp, the colour scheme and the layout is not pleasing to the eye. It's like it was thrown together quickly last minute. The app should make you excited to look at your personal finances, but every time I open it I wish I could change the entire look

Typical Bank App

Just started messing around with the service, but overall the look of the app left me underwhelmed. The functionality seems good (although the app feels a little slower than other bank apps) but the website layout and design is far superior.

Ok

App is okay functional wise but kinda annoying to look at in comparison to RBC's app (RBC is nicer and had a better layout)

App shutting down

Interface seems very outdated and everytime I try to sign in, the app glitches and shuts down. I see it was just updated a few days ago, I hope they fix this issue and make the interface more modern.

Nothing special.

The app seems very basic and cheap. The main account screen is very cluttered and overwhelming when you have a few accounts.

Face ID missing

Please add Face ID login option. Currently there's just option for touch id (finger print)

Looks ok but bad UX

Seems like there hasn't been much thought or investment in how the app works but more focus on how it looks. Had high hopes that motus would have a better experience than the meridian app but it's the same app with different branding. For an online only bank the digital touchpoint is so important but it doesn't leave me very confident in their offering. Hey at least it's free...

Could be better

- Have to log out in order to use the Contact Us option. This needs to be present EVERYWHERE. This includes an easy link to a branch or ATM near me.

- Have to log out in order to use the various calculators and see other MotusBank products

Please, stay far away from this!

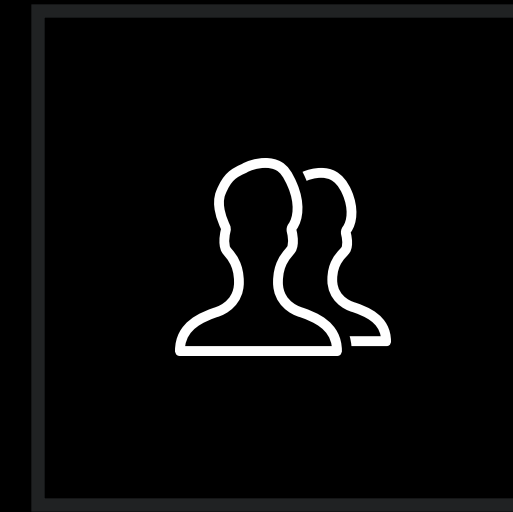

Wow, I don't know where to start. The appealing of no fee accounts and hi interest saving account do not worth the lack of services you will get with this bank. The app is not what you expect when you have in mind online banking. It's poorly designed, bulky and very slow. Each time you try to navigate in the interface, theres a waiting time of about 5sec on each click.

OTHER KEY DATA & KPI'S

Data Team Findings

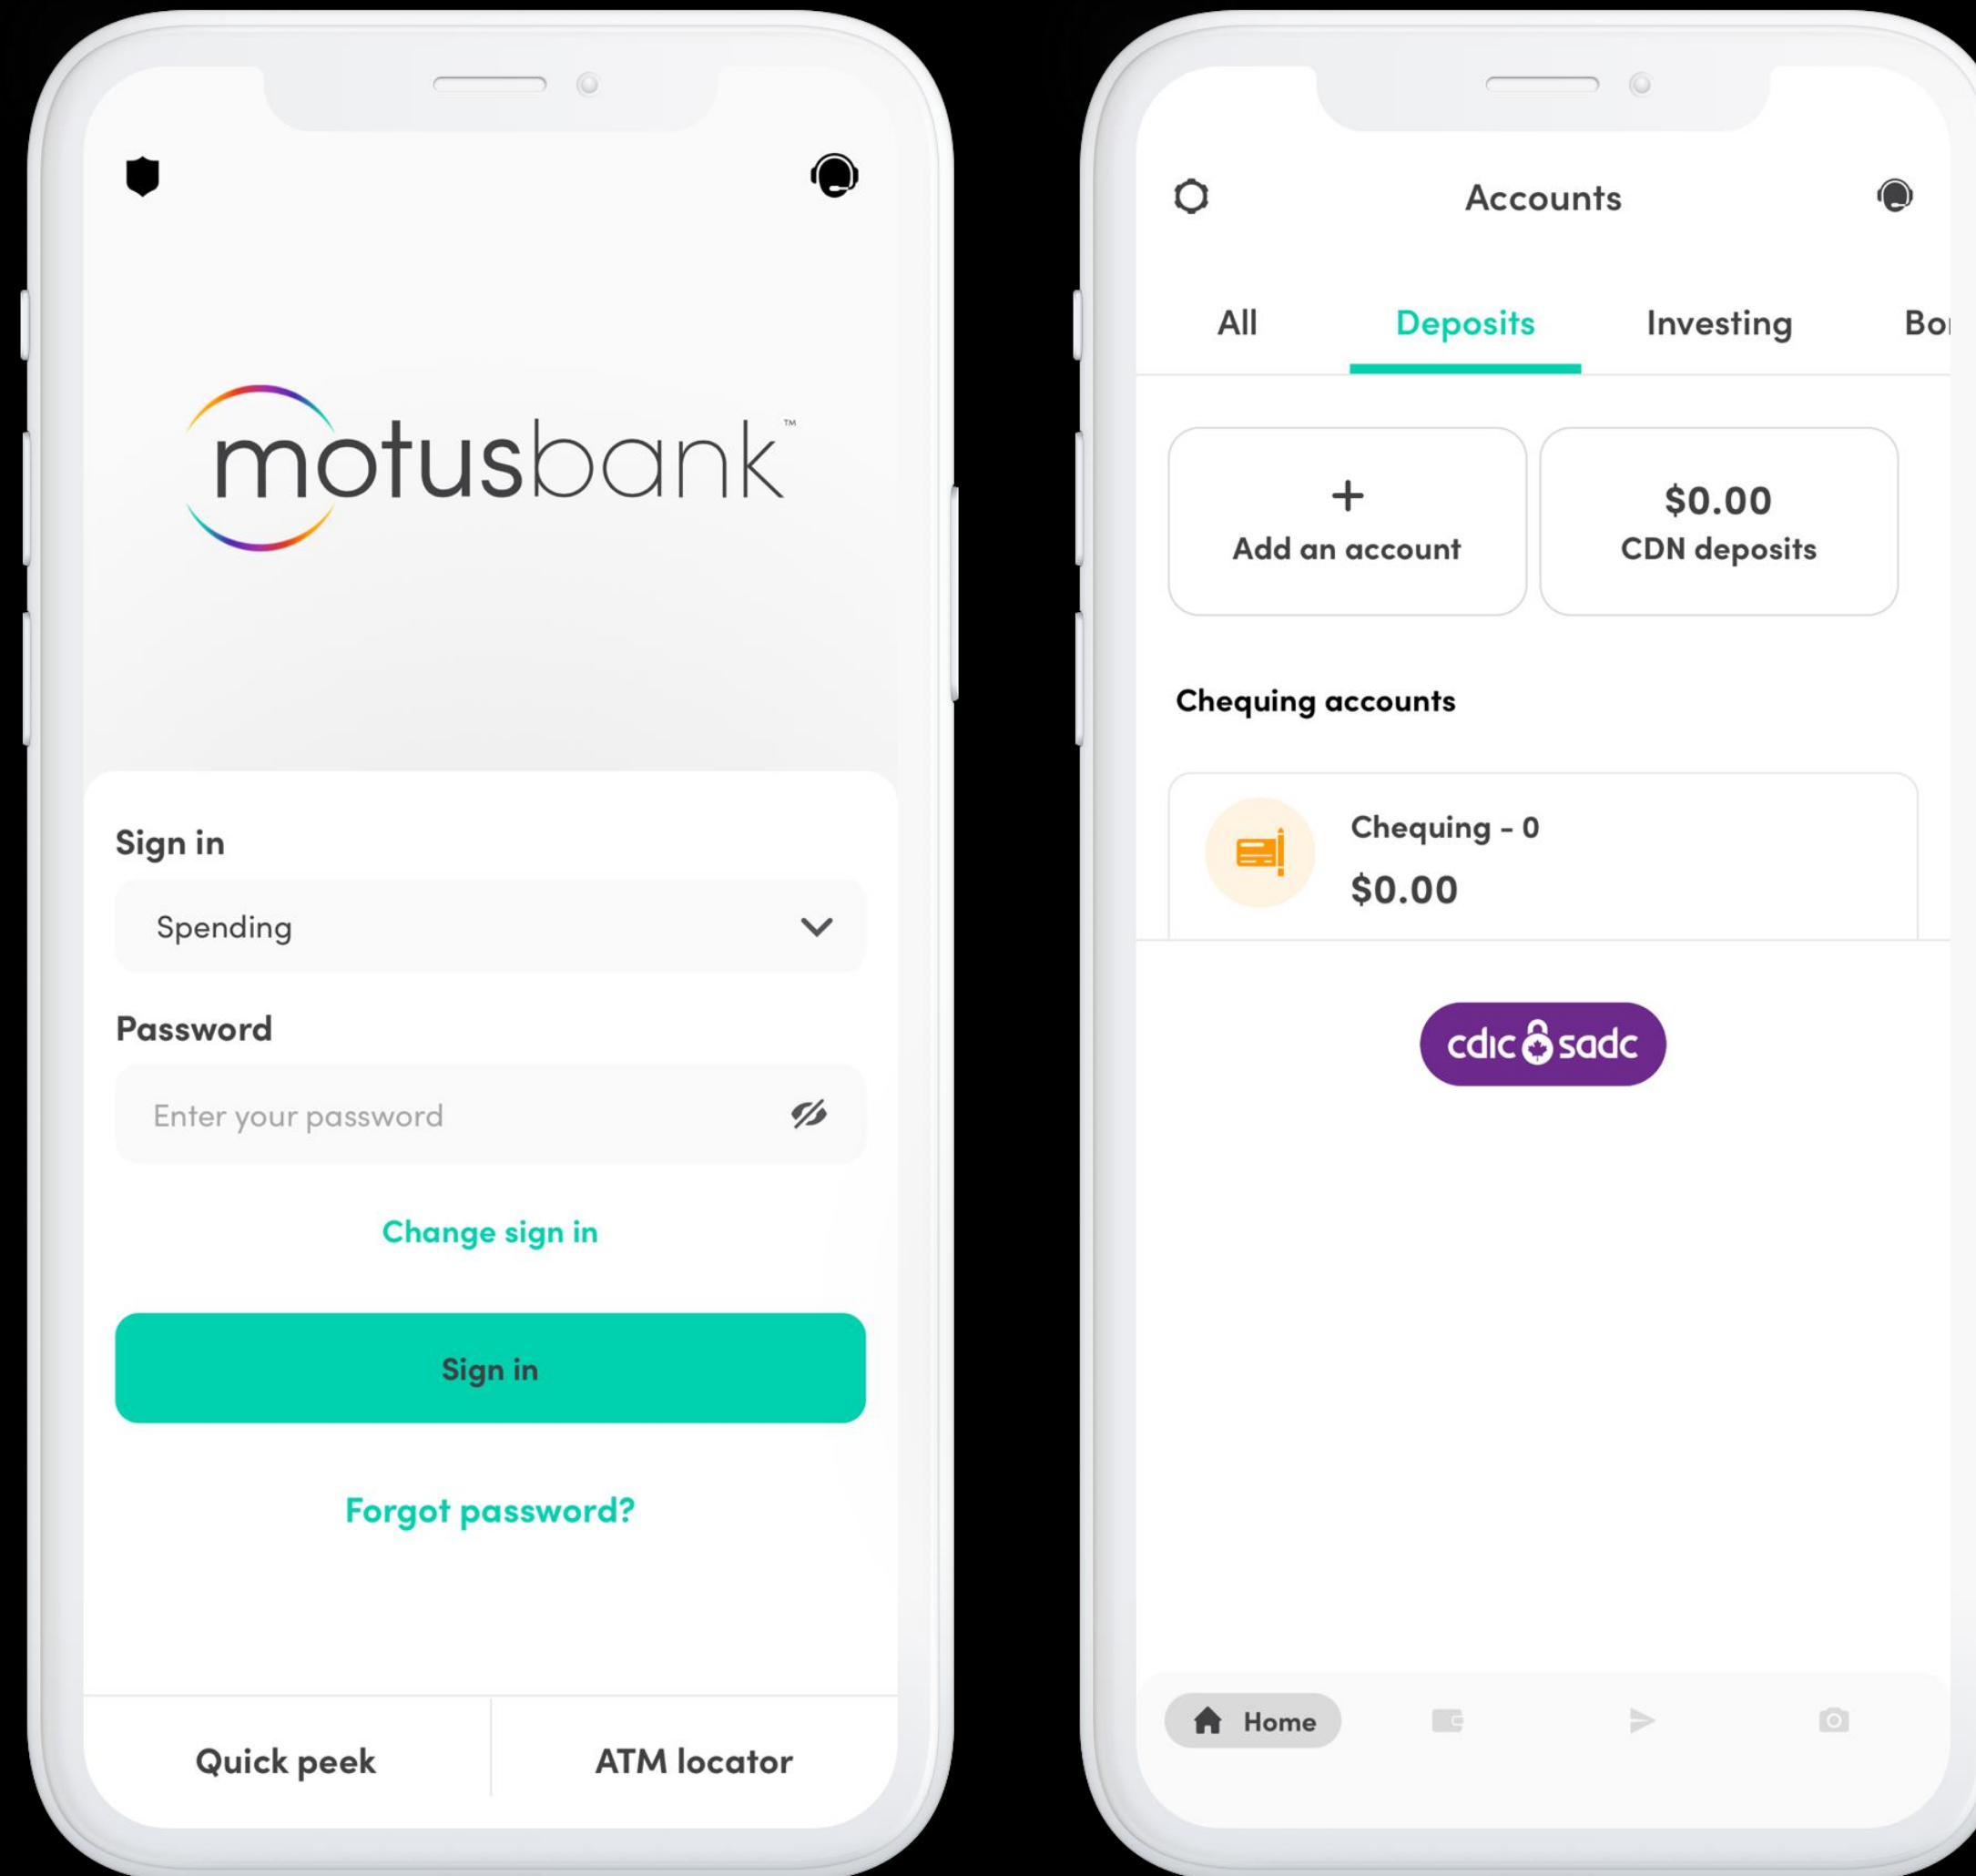

- Reviewing transactions
- Paying bills
- Depositing cheques
- Paying several bills and sending several e-transfers in the same session
- Low user engagement

Board KPI's

- Improve app store ratings and meet the following KPIs:
- Onboard new members;
- Keep members logging in;
- Facilitate opening products on the app

PROCESS

Transfer between accounts - set up a one-time transfer

Transfer between accounts - home page

Scenario: Member intends to transfer fund between his motusbank account and motusbank or linked accounts

Action: Member selects the account he wants to transfer to

Transfer to flow - details page

Scenario: Member completes the required fields for the transfer between accounts and selects continue

Action: Member selects to continue

Navigation
<-- = back to transfer between accounts home page
continue = to transfer to flow - details page

Transfer to flow - details page - Account transfer to select

member selects the account they wish to transfer to

Transfer to flow - details page - calendar select

Optional: Member selects the calendar date if they want to future date the transfer

Transfer to flow - review

Scenario: Member reviews the details of the transfer between accounts.

Next action: submit

Navigation
<-- = to edit
X = to cancel flow, return to transfer between accounts home page
submit = to move forward in flow

Transfer to flow - review - exit flow

Scenario: Member wants to exit the transfer flow, a confirmation page will appear

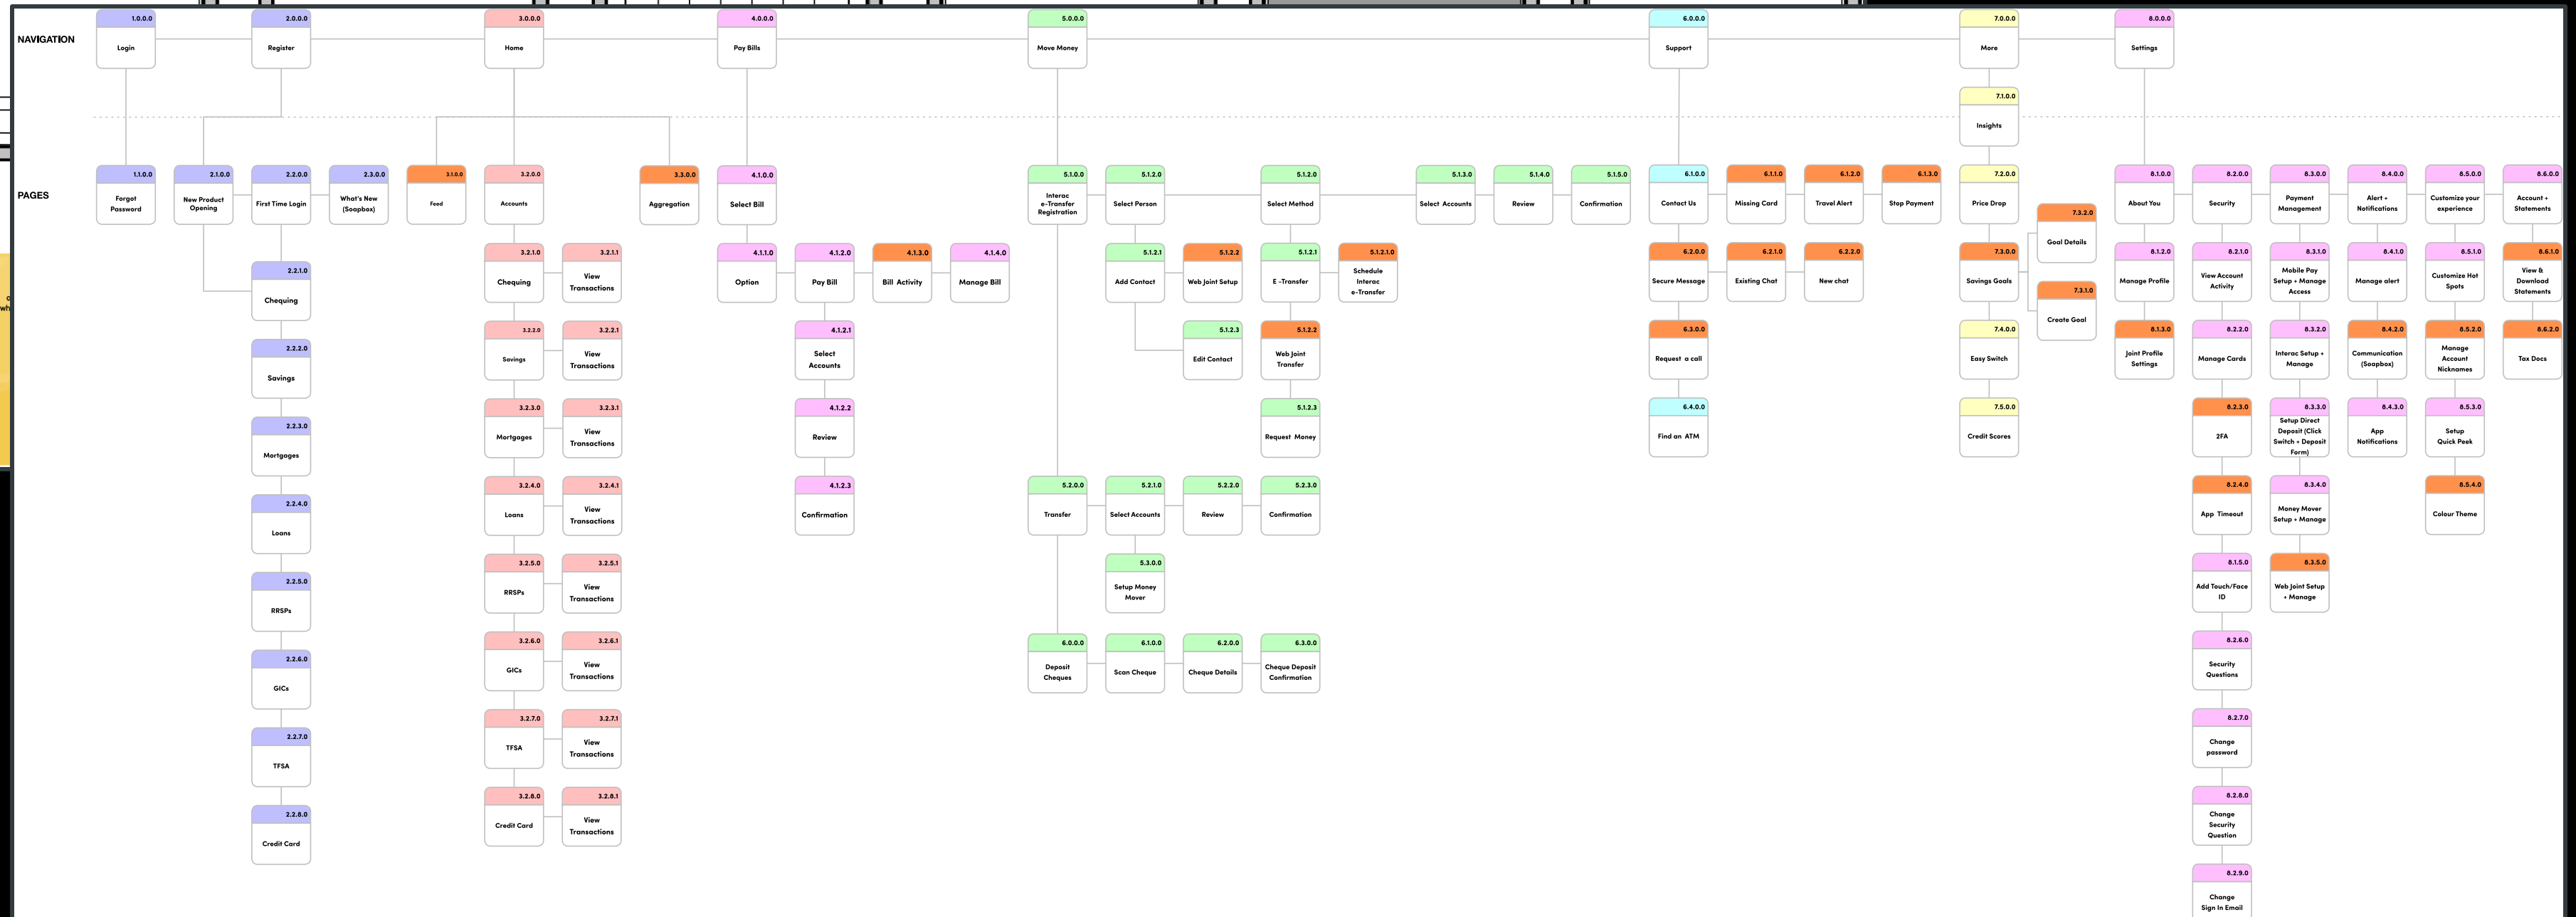

Navigation

No = back to review page
X = cancel transfer and exit flow. Return member to "transfer from" page

Transfer to flow - confirmation

Scenario: Member sees that the transfer is submitted. Member has the option to close the window or select another action

Navigation
X and close = leave flow, return to transfer between

USER TESTING

USER TESTING FEEDBACK

Key Feedback

- Removed recency and alphabetical lists (by default sorted by alphabet)
- Remote cheque deposit moved from transfer into own section.
- Removed shortcuts.
- Updated confusing iconography.
- Customers didn't notice amount field at the top of the screen. Moved amount further down on page flow.
- Confusion around camera section. Name changed from more, to apps, to camera.

The "pay a bill" button sounds awkward and slightly confusing. Perhaps something more direct and to the point like "submit" or "send payment"

I like that the direct deposit form is now easier to find. I've had trouble sometimes finding it on the web browser. I can't even remember being able to find it on the app.

UPDATED REVIEWS

New app is beautiful

The new app is finally competitive with the big five. Now we just need Apple Pay and Visa/MasterCard debit :)

After the long waited update, app looks gorgeous

Well done Motusbank 🙌🙌🙌🙌

Redesign: Updated rating

New app looks great. Too bad I'm no longer a customer because I thought the previous app was abandoned after 9 months of no updates. But now I might try it again in the future. Great to see incorporation of feedback.

Pleasant to use

I much prefer this new redesigned app to the previous one. I continue to look forward to further refinement and feature upgrades but this is a terrific upgrade to start.

Villamuez, 2021-03-16
